BOOST

## Ward's Marine Electric

The WME Portable Boost Transformers is safe, powerful, and can protect your 115/230 VAC equipment from many harmful low dock voltage conditions. Both the 100 ampere and 50 ampere versions are equipped with durable carrying handles and can be conveniently set next to your dockside power pedestal. When connected, a static 10% voltage boost is delivered to provide safer and more effective power to your boat. There are no manual overrides on these units, so the voltage will be boosted 10% regardless of input voltage.

Not suitable for marinas where erratic voltage fluctuations occur.

- 10% Fixed Boost
- Portable
- Compact Design
- 208/230 Primary Volt
- Single Phase

Item Number	Description	Price
<b>Portable Boost</b>		
BB208/230-50	50 AMP	\$1,844.00
BB208/230-100	100 AMP	\$3,687.40

## Charles Marine Industries

### Smartboost

- Provides a 15% AC voltage boost to any existing 50 Amp straight transformers when dockside power drops below 210 VAC
- Rugged high quality construction
- Fully automatic operation with manual 1:1 override
- Low voltage, boost & power LED indicators

### Portable Boost

- Unique "portable" dockside boosting module that increases incoming dockside power by 13%
- Designed for marinas where fluctuating power is an issue, and for those wired only for 208V
- Includes Soft Start Technology (SST)
